Research & Development of Real Estate in Mauritius, Thailand, United Arab
Emirates

Atomionics

Investor and Advisor

January 2018 - Present (7 years 9 months)

Singapore

Building quantum sensors for navigation and resource exploration.

Atomionics uses Atom Interferometry based sensing techniques to measure gravity, acceleration, and rotation. These sensors can build a complete map of the earth crust, provide precise navigation, and replace GPS with a universal positioning system that works everywhere-- underground, underwater, and even in space. Atomionics' focus is on bringing complex technologies from a lab environment to the dynamic real world with their first mission to democratise access to energy.
