Profile Summary

Highly motivated Computer Information Science graduate with hands-on experience as a trainee at RAK Airport, where I gained expertise in reviewing and translating data related to imported industrial materials for decision-making by police authorities. Proven leadership and teamwork skills demonstrated through participation in the Deajayon Eco-Exchange Program with the Environment Agency Abu Dhabi, where I was awarded 1st place for promoting sustainability through innovative VR stories. Experienced in delivering lectures on environmental success stories in South Korea and the UAE, implementing eco-friendly initiatives, and actively engaging in community outreach for environmental conservation. Skilled in data analysis, collaboration, and environmental education.
